●	Peters, Chris	50%
●	Walker, John	50%
●	Logan, Tom	100%
●	Peters, Chris	100%
●	Walker, John	100%

TimeControl & VersionOne...

Agile is one of the most powerful methods of managing complex software development environments. It's no wonder it has been adopted by most development environments around the world. VersionOne has brought that agile thinking to the Enterprise Project Management environment with its extensive online service.

Yet Agile is more than just planning sprints, logging defects and completing tasks. In many environments, there is a requirement to track the results of the Agile process for other internal processes and systems such as Billing, Job Costing, R&D Tax credits, contractor management. In some organizations users must enter their progress in multiple timesheet systems.

Now you can provide enterprise timesheet tracking to VersionOne with TimeControl. HMS and VersionOne have collaborated to integrate TimeControl and VersionOne so users have a single point of entry for their timesheet information for numerous systems at one time.

TimeControl will send back hours and work To-do to VersionOne but will also send information to HR, Payroll, Billing, the corporate ERP or anywhere else it is required.

Need one place to manage non-project work, banked overtime, vacation requests, your bank of personal time, entries for time off more? TimeControl does all this and more while seamlessly integrated with VersionOne

...Integrating Enterprise Agile Project Management and Enterprise Timesheets

Use one timesheet for both Project Management and Finance

Now timesheet collection can be done only once. The multi-purpose TimeControl system includes not only integration with VersionOne but also all the functionality to support Finance, Payroll, HR and your ERP. Isn't entering your timesheet one time enough?

Install onsite or subscribe online

TimeControl is available for purchase for installation at your premises or as a subscription service in the Cloud where you could be running with TimeControl instantly.

Vacation Management with TimeRequest™

TimeControl includes the TimeRequest module which enables approval and management of time-off requests such as vacation or personal time or any other category of time in the future that must be approved in advance.

TimeControl Mobile™

TimeControl Mobile is a web interface that is included with TimeControl. As a mobile web-application there's nothing to install. The user simply points their smartphone browser to a specific URL of their TimeControl implementation and they are directed to the interface specifically created for their iPhone, BlackBerry, Android or Windows 7 Mobile device.

Timesheet Matrix Approvals

TimeControl's unique Matrix Approval Process for Labor Actuals™ allows for quick authorization of project data by both Project Managers and Supervisors along with automated validation with TimeControl's remarkable business Validation Rules.

Links to Project Management Systems

Aside from VersionOne, TimeControl includes direct links to project management systems such as Microsoft Project and Project Server, Primavera, Hard Dollar's HD, Deltek's Open Plan, and Cobra.

Custom Reporting

TimeControl includes its own custom reporting engine which allows you to create an unlimited number of reports which can then be saved in numerous formats!

The screenshot displays the TimeControl web application interface. At the top, there's a navigation bar with 'Home', 'Timesheet', 'Reports', 'Tools', 'Documentation', and 'Legacy'. Below this is a toolbar with icons for 'List', 'Entry', 'Previous', 'Next', 'Add', 'Delete', 'Release', 'Reject', and 'Print'. The main content area is titled 'Entry' and contains two sections: 'Employee Information' and 'Timesheet Information'. The 'Employee Information' section shows 'Employee Barrow, Paul'. The 'Timesheet Information' section shows 'Period 2/14/2015 - 2/20/2015', 'Timesheet Source Paul Barrow', 'Timesheet Status DRAFT', 'Last Owner Paul Barrow', and 'Timesheet Owner Paul Barrow releasing to Gardner, Joseph'. Below these sections is a table with columns for 'Project Name', 'Charge Code', 'Charge Description', 'Rate Code', 'Mon', 'Tue', 'Wed', 'Thu', 'Fri', 'Sat', 'Sun', 'Total', 'ETC', and 'Complete'. The table contains four rows of data. A red box highlights the 'Total' column for the first row, which shows '8h'. A red arrow points from this box to the left, and another red arrow points from the bottom of the table to the left. At the bottom of the interface, there's a summary row showing '8h 8h 8h 8h 8h 0h 0h 40h'. The browser window title is 'TimeControl - Entry - Windows Internet Explorer' and the address bar shows 'http://localhost:82/Application/Timesheet/TimesheetEntry.aspx?st=66mmu=61845=ACTIVE&id=119'. The user 'Paul Barrow' is logged in, with links for 'Dashboard', 'My Account', 'Logout', and 'Help'.

Project Name	Charge Code	Charge Description	Rate Code	Mon	Tue	Wed	Thu	Fri	Sat	Sun	Total	ETC	Complete
CALLCENTER_1-0	CALLCENTER_1-0-D-01006	Sample: Bad Part Number Allowed	S	2h	2h	4h					8h		<input type="checkbox"/>

TimeControl is a multi-function timesheet system designed to integrate with both Project Management and Finance systems

TimeControl functionality includes...

Purchase or Subscribe

TimeControl is available for purchase for an on-premises installation or as an online hosted subscription in the Cloud.

Business Validation Rules

Check automatically with our business rules validation system if a crew or individual timesheet meets the organization's criteria. Administrators can configure as many rules and warnings as they wish.

Extensive Rate management

TimeControl's extensive rates make an unlimited number of rate codes available per employee and multiple values per code.

Manage Vacation, Sick Leave, Personal time

TimeControl allows time to be managed banks of Vacation, Sick Leave, Personal time and any other definition of non-project time. You can even use TimeControl's TimeRequest™ module to request vacation or time-off approval.

The Matrix Approval Process for Labor Actuals™

HMS Software's unique *Matrix Approval Process for Labor Actuals™* allows both the organizational and project aspects of the organization to approve timesheet data.

Integration with external systems

Along with VersionOne, TimeControl includes links with Primavera, Microsoft Project, Project Server, Deltek's Open Plan and Cobra, Hard Dollar's HD and can link to virtually any HR, Payroll, Finance and ERP system

Free TimeControl Mobile App included

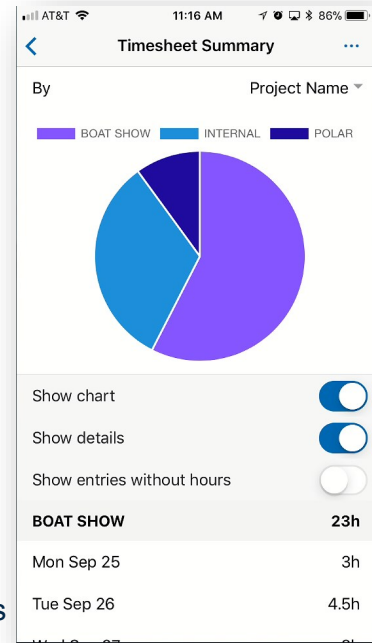

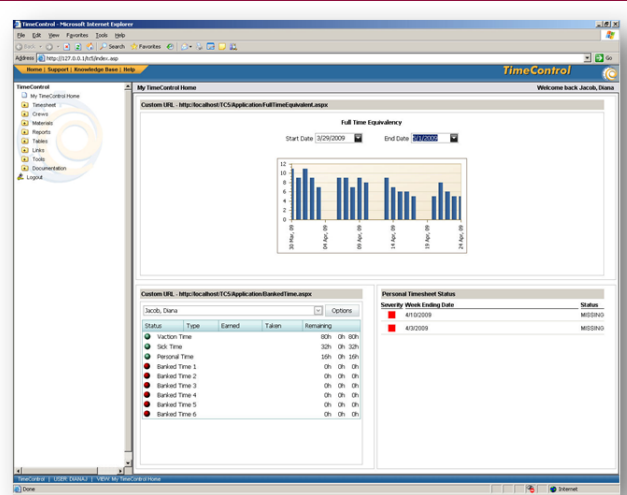

Enter your back-office timesheet or do individual timesheet approvals with The TimeControl Mobile App. Available from the Apple App Store for iOS devices and Google Play for Android devices.

Email notification

TimeControl includes an ability to automatically schedule email notifications for missing timesheets.

Government Compliance

TimeControl is designed to conform with numerous government directives such as the DCAA, ARRA Reporting, Sarbanes-Oxley, R&D Tax credits, FMLA and the European Time Directives.
